About me

I am a fresh graduate in Business IT, specializing in web development and user experience. I'm particularly interested in creating seamless digital experiences that are both functional and user-friendly. In my free time, I have long enjoyed engaging in good workouts, which give me an extra boost for my days. At home, I take care of my furry roommate, and I hone my skills by self-studying topics that interest me, including languages, coding, and photography

Work experience

Customer Data Trainee, Professio Group Oy, Espoo

December 2024 – August 2025

My job includes using the CRM system to update the customer database, which plays a central role in the company's operations. I developed a Python program that has significantly sped up the workflow for both me and my colleagues

Customer servant and a salesman, Alko Oy, Espoo

November 2023 – January 2024

I worked around the cash register, but I also actively participated in shelf stocking, while helping customers to the best of my ability

Customer servant and a salesman, Biltema Suomi Oy, Espoo

September 2017 – May 2021

While studying, I worked as a salesperson, handling various tasks such as cashier duties, customer service, and displaying and restocking products

Education

Business Information Technology, Haaga-Helia University of applied sciences, Helsinki

August 2020 – June 2025

I began my Bachelor of Business Administration studies in the autumn of 2020 through the open university and transitioned to full-time student in the spring of 2023. I successfully completed my degree in June 2025

Dual qualification, Vocation Qualification in Business and Administration, Business College Helsinki

August 2015 – June 2018

I graduated from Business College Helsinki vocational school in 2018 with a Finnish Matriculation Examination
